

28th. October . 2014

Dear friend in the UK

I am glad to write to you this letter.

How are you over there, I have hope nothing is wrong. I am a boy in Primary seven in our school here in Amuru district Northern Uganda.

I like schooling because I need to get enough knowledge and become a doctor in future.

I always wake up early in the morning help my parents with farm works and domestic work. On Sunday we go to Church together with my parents.

I like prayer because I want God to help me under difficulties and through my study.

On week days, I wake up early in the morning bath myself and I put on my school uniform and go to school. I dislike coming late to school because it is bad.

At school I enjoy reading newspaper because it will help me to become a good doctor who knows how to speak to people.

That is what I am interested in ^{our} ~~at~~ school.

If I become a doctor in future, I would build my own hospital and treat sick people in my community.

If possible one day we shall meet there in UK and I hope God will help me achieve my goal of becoming a good doctor in future.

My friend, we shall talk a lot if you reply my letter.

Thanks

Yours

friend
